RE: Cloud Developer Intern

Dear Hiring Manager,

I am thrilled to see the opening position of Cloud Developer Intern posted by State Street on the company website. With solid experience and passion for computer science, I believe I am the right fit for this role.

The project that State Street is running is attractive to me. Even though I cannot completely visualize how it could be, it sounds great and fantastic. It is not a traditional bank. State Street is going to build it from the ground up and uses edge-cutting technologies, like cloud computing and artificial intelligence. I would feel very proud if I could join such a dynamic team.

I am pursuing my CS master's degree program from the Georgia Institute of Technology. Besides, I also advanced my knowledge by taking MOOC courses, like the nano-degree program from Udacity and courses from Udemy. Apart from this academic background, I also possessed solid hands-on experience. When working with EyesHigh Edu. and Tech., I was heavily involved in two projects. The first one is a smart-job-hunting system. For the backend part, I developed Restful APIs with Java, conducted the unit test, and built databases with both AWS RDS and MongoDB. For the frontend part, I used React for page rendering and DOM manipulation. Following the agile style, we continuously deployed our code into AWS using Docker and K8S and ran user tests. The second project is developing and integrating a plugin into the official website (student learning portal) based on WordPress. I almost single-handedly executed the whole project, including requirements collections, database design and creation, PHP and JS library integration, user tests, etc. This project pushed my knowledge boundary (jQuery, Ajax, PHPMailer, Google Chart, DataTable, and Google reCAPTCHA).

I am very interested in this opportunity of Cloud Developer Intern provided by State Street. Considering my experience and skillset, I firmly believe I can contribute to the success of projects in your company. I am looking forward to discussing more of the opportunity. Thanks a lot for your consideration.

Sincerely,

Woody Wang
